What is Bingen Summer School?

Bingen Summer School is a joint initiative of the University of Applied Sciences Bingen and its associated universities. Summer School has been comprising six European universities and involves 30 researchers ranging from professors to undergraduate students. We are also striving to extend this network and bring in new partners. Bingen Summer School proves to be a truly international and multicultural event and we gladly

welcome students who are interested in environmental studies.

The theme of Bingen Summer School is Environment and Climate change. Our activities span a wide range from lectures to workshops and excursions. The current research is clustered into a large variety of scopes: meteorology, geology, renewable energies, environmental management systems, nature conservation, the role of law, and image processing.

Our academic staff come from all over Europe and the USA. English is the working language and in order to assure active participation of all students, a sound command of English in all respects is a prerequisite.

Bingen Summer School

We aim at uniting undergraduate students interested in the vital issue of climate change. Bingen Summer School provides knowledge, insight and understanding along with the experience of working and communicating in a foreign country, in a foreign language – at least for most students. There will be many opportunities to get to know the wonderful region of the romantic Rhine, to experience German hospitality and German culture.

Students can achieve credit points by summarising their study results in a presentation.

Environment and Climate Change

We aim to showcase a wide range of research from around our associated universities in order to encourage debates.

Preliminary Programme:

The talk titles:

- **Reasons and results of climate change - a multidisciplinary approach on the impacts on our environment**
- **Geology and the history of climate change**
- **Challenges to nature conservation in Germany**
- **Basics of Meteorology**
- **The end of fossil fuels**
- **The role of law in environmental protection**
- **The Kyoto protocol in practice**
- **Economic impacts of climate change**

Participating Universities:

In the past students and lecturers came to Bingen from the following partner universities

- **Norway: Sogn og Fjordane University College in Sogndal**
- **France: École Nationale Supérieure d'Ingénieur de Bourges (ENSIB) in Bourges**
- **Great Britain: Sheffield Hallam University in Sheffield**
- **Finland: Mikkeli University of applied sciences in Mikkeli**
- **Italy: Università Ca' Foscari Venezia in Venice**
- **USA: Oklahoma State University, Oklahoma**
